

**Darien Public Schools, Instructional Technology Specialist,
Elementary Schools**

Responsible for developing the computer curriculum in Darien's five elementary schools so that technology is integrated into and enhances the academic curriculum. As a staff developer, supported teachers through workshops, model teaching, and individualized training. Supervised the district's computer aides. Served on the Technology Planning Committee, helping to define the district's 5-year plan.

Rippowam Cisqua School, Lower School Computer Coordinator

Developed and delivered a computer literacy curriculum for grades K-4. Projects focused on the use of multimedia, productivity software and digital references such as Kid Pix, HyperStudio, Apple Works, Encarta, and the Internet. Lessons were directly related to the elementary school curriculum.

Pomona Middle School, Technology Teacher

Moving beyond traditional technology, this 8th grade class emphasized media literacy and the use of instructional technology as a tool for research and communications.

Teaching Matters, Inc., Staff Developer: Taught elementary and middle school teachers to use software and integrate technology in the classroom. Developed and presented workshops for teachers on using productivity software and on integrating technology into the curriculum.
